AI Module Gender Violence_

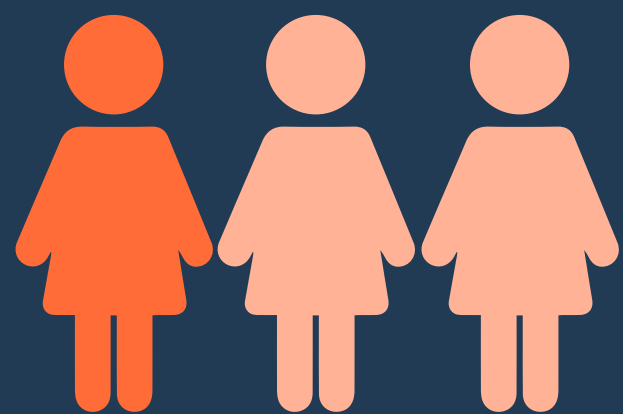

Antwerp, June 2024

VISION

IT FOR SOCIAL DEVELOPMENT

About 1 in 3 women has been a victim of physical or sexual violence.

each hour

On average 5 women or girls are killed every hour by someone in their family.

More than half of women's homicides are committed by their partners or family members.

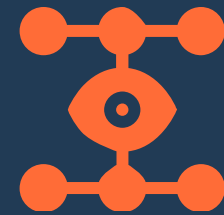

**VISION has
developed an AI
assistant for women
victims of violence
helplines_**

How does it work_

The tool analyzes the call and associates it with the victim's data.

AI records and transcribes the call automatically

Identifies warning patterns such as the detection of weapons in the home.

Helps to generate a unified risk guideline, and suggest further action.

Impact_

VISION's AI tool can help save lives.

It can help identify cases of gender-based violence early on.

It can help victims of gender-based violence get the help they need.

It can help authorities prevent gender-based violence.

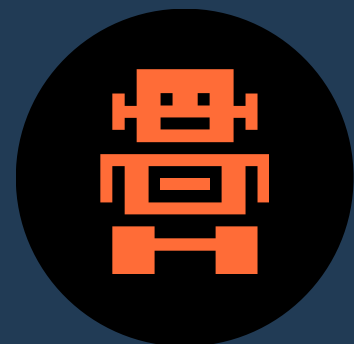

The future of AI in social development_

Vision is expanding its AI applications to other components of the Comprehensive Care Model GV.

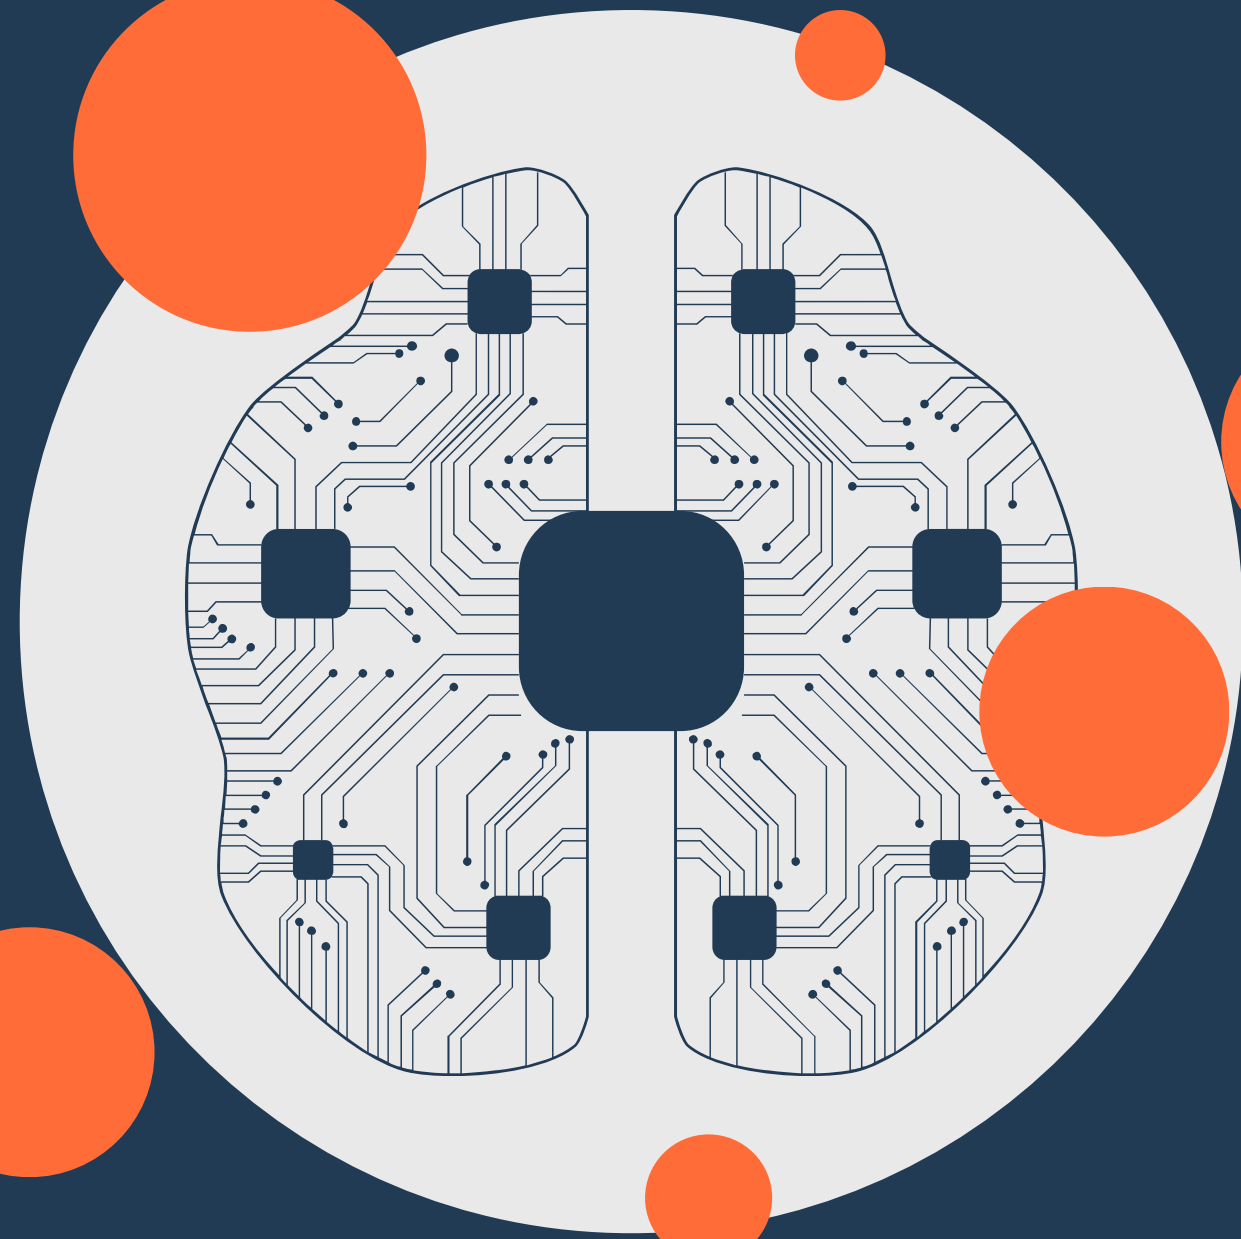

The company is also exploring the application of AI in other areas of social protection.

Vision believes that AI can be a powerful tool for improving the lives of the most vulnerable.
